Application No. 09/853,337

Filed: May 10, 2001

Attorney Docket No. 031926.0009.UTL

ON PETITION

This is a decision on the petition under 37 C.F.R. § 1.137(b), filed May 11, 2004, to revive the above-identified application.

The petition is **DISMISSED**.

Any request for reconsideration must be submitted within TWO (2) MONTHS from the mail date of this decision. No further petition fee is required for the request. Extensions of time under 37 CFR 1.136(a) are permitted. The reconsideration request should include a cover letter entitled "Renewed Petition under 37 CFR 1.137(b)." This is **not** a final agency action within the meaning of 5 U.S.C. § 704.

The above-identified application became abandoned for failure to reply in a timely manner to the restriction requirement mailed December 30, 2002, which set a shortened statutory period for reply of one (1) month. No extensions of time under the provisions of 37 CFR 1.136(a) were obtained. Accordingly, the above-identified application became abandoned on January 31, 2003. A Notice of Abandonment was mailed on September 10, 2003.

A grantable petition under 37 CFR 1.137(b) must be accompanied by:

- (1) the required reply,
- (2) the petition fee,
- (3) a statement that the entire delay in filing the required reply from the due date for the reply until the filing of a grantable petition pursuant to 37 CFR 1.137(b) was unintentional, and
- (4) a terminal disclaimer and fee if the application was filed on or before June 8, 1995 or if the application is a design application.

Where there is a question as to whether either the abandonment or the delay in filing a petition² under 37 CFR 1.137 was unintentional, the Commissioner may require additional information.

¹ In a nonprovisional application abandoned for failure to prosecute, the required reply may be met by the filing of a continuing application. In an application or patent abandoned or lapsed for failure to pay the issue fee or any portion thereof, the required reply must be the payment of the issue fee or any outstanding balance thereof.

² See MPEP 711.03(c)(III)(C) and (D).

The instant petition lacks item (1). Petitioner failed to include the proper response to the Office action mailed on December 30, 2002. To revive the above-identified application, petitioner must submit a response. A copy of the Office action is enclosed for petitioner's convenience.

The instant petition appears to be on the behalf of the assignee. However, the petition does not comply with 37 CFR 3.73(b). 37 CFR 3.73(b) provides that: (1) when an assignee seeks to take action in a matter before the Office, the assignee must establish its ownership of the property to the satisfaction of the Commissioner; (2) ownership is established by submitting to the Office, in the Office file related to the matter in which action is sought to be taken, documentary evidence of a chain of title from the original owner to the assignee (*e.g.*, copy of an executed assignment submitted for recording) or by specifying (*e.g.*, reel and frame number) where such evidence is recorded in the Office; (3) the submission establishing ownership must be signed by a party authorized to act on behalf of the assignee; and (4) documents submitted to establish ownership may be required to be recorded as a condition to permitting the assignee to take action in a matter pending before the Office. A 37 CFR 3.73(b) statement is enclosed.

The file does not indicate a change of address has been submitted, although the address given on the petition differs from the address of record. If appropriate, a request to change the address of record should be filed. A courtesy copy of this decision is being mailed to the address given on the petition; however, the Office will mail all future correspondence solely to the address of record.

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claim 1, for group I claims 1-37, drawn to an optical router in which a plurality of channel combiners, one channel combiner of the plurality of channel combiners per multiplexing unit of the plurality of multiplexing units, each channel combiner of the plurality of channel combiners being coupled to a different one of the outputs of the plurality of outputs of the first spatial switching fabric, said each channel combiner being capable of receiving and multiplexing channels received from the corresponding output of the plurality of outputs of the first spatial switching fabric and the channels multiplexed by the multiplexing unit associated with said each channel combiner, classified in class 359, subclass 152.
 - II. Claim 38, for group II claims 38-42, drawn to an optical router in which, a plurality of multiplexing units, one multiplexing unit of the plurality of multiplexing units per bundle, each multiplexing unit of the plurality of multiplexing units being coupled to a respective output of the plurality of outputs of the first spatial switching fabric, said each multiplexing unit of the plurality of multiplexing units being capable of multiplexing at least a subset of channels of the bundle associated with said each multiplexing

unit, the add wavelength channel converted by the converter associated with the bundle that is associated with said each multiplexing unit, and channels received from the respective output of the plurality of outputs of the first spatial switching fabric, classified in class 359, subclass 154.

III. Claim 43, for group III claims 43-45, drawn to an optical router in which a first channel combiner coupled to the first output of the plurality of outputs of the first spatial switching fabric and to the first wavelength conversion module, the first channel combiner being capable of receiving and multiplexing wavelength channels from the first output of the first spatial switching fabric and the channels multiplexed by the first multiplexing unit; and a second channel combiner coupled to the second output of the plurality of outputs of the first spatial switching fabric and to the second wavelength conversion module, the second channel combiner being capable of receiving and multiplexing wavelength channels from the second output of the first spatial switching fabric and the channels multiplexed by the second multiplexing unit, classified in class 359, subclass 157.

IV. Claim 46, for group IV claims 46-57, drawn to an optical router that uses optical fibers as means for first and second wavelength selection, first and

Art Unit: 2877

second wavelength multiplexing, first spatial switching, and first and second channel combining for combining wavelength channels appearing at the first/second output of the first/second spatial switching means and the wavelength channels multiplexed by the first/second wavelength multiplexing means, classified in class 385, subclass 24.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions Group I, II, III claims and Group IV claims are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case Group IV invention can be used as in optical interference filters as optical add/drop WDM rather than using wavelength channel filters used in SONET/SDH network for routing data.
3. Because these inventions are distinct for the reasons given above and the search required for Group IV is not required for Groups I, II and III restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

Art Unit: 2877

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
